IRRIGATION PLAN CHECK

(revised 03/25/10)

Irrigation plans must be drawn to scale on a minimum of 11"x17" sized sheet.

The Irrigation Plan shall not be drawn on a copy of a copyrighted material, which includes Plot Plans and Site Surveys.

As per the new TRCC rules and regulations for landscape irrigation that went into effect on 01/01/09, all of the following requirements must be shown on plans submitted for irrigation systems.

The Irrigation Plan must include:

- Irrigator's seal, signature and date of signing
- Major physical features and boundaries of the area to be irrigated
- A north arrow
- A legend
- Zone flow measurement for each zone
- Location and type of controllers and sensors
- Location, type, and size of water sources, backflow prevention device, water emission device, valves, pressure regulation component, and main line and lateral piping
- Scale used
- Design pressure

For further information or questions, please contact Donald Frizzell at 281-275-2292 (direct) or 281-275-2218 (main number); 2700 Town Center Blvd. North; Sugar Land TX 77479
